Registration Instructions

⚠️ **YOU MUST REGISTER THIS DEVICE BEFORE IT WILL WORK**

To install your Telstra Go Stationary Smart Signal Repeater, follow the instructions in the Quick Start Guide. Professional installation is recommended. To register your Telstra Go Stationary Smart Signal Repeater follow the instructions below:

Step 1

The status indicator LED

Telstra GO Smart Signal Repeater
The status indicator LED will be blinking RED. Wait for the system to complete the network selection which **can take between 5 to 7 minutes.** When complete, the user interface will indicate that **registration is required from the Wave App.**

Step 2

Smartphone or Tablet
With your smartphone or tablet, complete registration by using the Cel-Fi WAVE application (Android or iOS).*

Connect/Pair to Smart Signal Repeater

🅱 Bluetooth®

Step 3

Go to the **App Store** or the **Google Play Store** and search for "Cel-Fi WAVE" to download the free app.

 Download on the App Store

 GET IT ON Google play

Step 4

Launch the Cel-Fi WAVE app in **close proximity** to the Telstra GO Stationary Unit.

Step 5

Once the application has connected to the Telstra GO Stationary Smart Signal Repeater, you will be prompted to register.

For more information and helpful videos about the installation and registration of the Telstra GO system, please visit www. cel-fi.com/register. As part of the registration process Telstra will collect your private information including name, contact details and location. Please see our Privacy Policy at https://www.telstra.com.au/privacy/privacy-statement for more details.

Cel-Fi Safe

Telstra GO Stationary Yagi Antenna Bundle

Quick Start Guide
Telstra GO is an evolved cellular repeater design that can amplify cellular signals. Connect a single Donor External Antenna to receive the macro-network signals, and then a single indoor Service Antenna where you need service, and Telstra GO will do the rest automatically once you register.

Press the **MODE** button on the unit to select desired scanning mode. Status Indicator will blink during the setup process, and may take a few minutes to complete.

6 — Tips & Tricks

- Keep **Donor** and **Service Antennas** separated/ isolated from each other for best performance
- For best performance, the cable between the **Donor Antenna** and the Telstra GO unit should be as short as possible
- Use sealant if any connections are exposed to elements

7 — Installation Process

For more **Telstra GO** features, go to **App Store** or **Google play** and download the mobile **Cel-Fi WAVE App.**
